

Every docket entry, *billed exactly once.*

Your AppColl docket entries should appear in Clio as billable time the moment your attorneys log them — every time, without a person re-keying them by hand. **DocketBridge does exactly that.** It runs on a single workstation in your office, never sends client data to the cloud, and makes duplicate billing structurally impossible.

FIG. 1 — Entries flow AppColl → gate → Clio; duplicates are caught at the gate and logged.

WHAT IS CLAIMED

1.

No duplicate billing

Every entry carries an idempotency key. Any retry — network blip, crash, restart — posts exactly once. Never twice.

2.

Local-only deployment

Runs on one workstation inside your firm. No third-party cloud ever holds client matter data. Credentials in the OS keychain.

3.

Bar-grade audit trail

Every entry logged with timestamps and its docket source. When a client questions an invoice, the answer is one search away.

WHAT'S INCLUDED

- AppColl-to-Clio time entry sync, fully automated.
- Idempotent processing — the same task synced twice never creates two billing entries.
- Real-time log feed visible from your dashboard during every sync.
- Failure detection for Clio downtime, AppColl rate-limits, and unreconcilable tasks.
- OS-level credential storage via Windows Credential Manager — no plaintext config.
- Updates and API-change coverage — patches within 7 days at no extra charge.
- Email support within one business day, plus a 30-minute onboarding session at signup.

FEE SCHEDULE

MONTHLY

\$399

per firm / month

ANNUAL

\$3,990

per firm / year

SAVE 17%

Flat per firm. No per-user fees. No per-task fees. One price whether you have 2 attorneys or 20 — every attorney, every paralegal, every matter.

WHO IT'S FOR

IP law firms with 2+ attorneys using **AppColl** for docketing and **Clio** for time billing. Especially when:

- ✓ Attorneys are double-entering time across both systems and resenting it.
- ✓ An administrator spends hours reconciling AppColl and Clio every billing cycle.
- ✓ A duplicate billing entry has reached a client and strained the relationship.
- ✓ The firm wants cleaner, defensible records going forward.
